**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View
Strong winds combined with damp conditions will give an enhanced chill despite relatively mild conditions.

Forecast for Saturday 20 Nov 2021
Weather: Patchy drizzle through the early hours turns to heavy persistent rain around dawn. This turns briefly to snow above 900m before clearing south around midday. Colder clearer conditions then follow, but with scattered showers, falling as snow above 700-800m. Shower turn heavier and more frequent for a couple for hours in the evening.

Maximum wind: West 25-30 gusting 35-40 mph, becoming Northwest 20 gusting 30 mph by evening.

Chance of cloud free mountain/hill tops above 800m: Nil in the morning, 50% in the afternoon and evening.

Visibility: Poor in the morning in low cloud, bases around 600-800m. Variable in the afternoon, poor in passing low cloud and showers, but very good outside of these. Occasional cloud above 800-1000m.

Temperature: **Glens:** Plus 9 Celsius falling to plus 6 Celsius in the afternoon, and plus 5 Celsius in the evening.
At 800m: Plus 6 Celsius, falling to plus 3 Celsius in the afternoon, plus 1 Celsius in the evening.
Freezing level: Above the summits, falling to 1200m by late morning, 900m by evening.
